

Postfix

How to use SPAMTRAPs with Postfix,Spamassassin,Linux?

Create local user [spammerswelcomehere].

In `/etc/aliases` add line [spammerswelcomehere]:[space or tab]"|usr/bin/sa-learn --spam".
Execute following command: `postmap[space]/etc/aliases`.

For virtual domain spamtraps.

Add following line "[spamtrapaddress@yourdomainname.com][space or tab][spammerswelcomehere]" to `/etc/postfix/virtual`. Execute `"postmap[space]/etc/postfix/virtual"`.

For local addresses add following line to `/etc/aliases`: "someusername[space or tab][spammerswelcomehere]". Execute command `"postmap[space]/etc/aliases"`.

Tail mail logs to see if all working right.
